INTERSTELLAR STARTUP SPACESHIP

MATERIALS: Scissors or X-acto knife and liquid or roll-on glue

DIRECTIONS: Cut out all parts along solid lines. Score and fold all pieces along dotted lines and glue numbered tabs to corresponding tabs in sequence. Fold wings and stabilizer in the middle onto themselves. Attach them to the sides and top of the ship as shown in photo. Fold the rocket nozzles along the long sides creating cylindrical shape. Glue the caps on both ends. Attach the nozzles to the back of the ship. Your spaceship is complete! Enjoy!
